This is a survey of upcoming graduates of the Bachelors of Aerospace Engineering and Mechanics program. Results will be used to evaluate and improve the quality of the educational experience provided by the BAEM program. The final question about your plans following graduation is important for us in determining whether we are meeting our educational objectives. Please answer this to the best of your ability. Your responses are very important and will be kept confidential. Thank you.

When will you receive the BAEM degree from the University of Minnesota?
- 2007 (spring, summer, or fall)
- 2008 (spring, summer, or fall)
- Other

Based on your U of M coursework, rate all the following statements, "Strongly Agree", "Agree", "Neutral", "Disagree", or "Strongly Disagree." In your rating, take into account all coursework (technical and liberal), directed study, and other projects, internships, technical employment, and extra curricular activities during your enrollment at the University of Minnesota. The first 17 statements apply to all IT educational experiences while the remaining 13 statements apply to the BAEM.

</table>
12. The basic mathematics component of my engineering education prepared me.
13. The lower division academic advising at the University of Minnesota was good.
14. The computational facilities available for my coursework and projects were
good.
15. Instructors were available to discuss course-related issues outside of class.
16. My courses included active learning experiences, such as discussion and team
projects.
17. The upper division academic advising for the BAEM program was good.
18. My education provided me with a good understanding of engineering
materials.
19. My education provided me with a good understanding of aerodynamics.
20. My education provided me with a good understanding of aerospace structures.
21. My education provided me with a good understanding of aerospace propulsion
systems.
22. My education provided me with a good understanding of atmospheric flight
mechanics.
23. My education provided me with a good understanding of orbital mechanics
and space flight.
24. My education provided me with a good understanding of flight dynamics and
control.
25. The design experiences provided throughout the BAEM curriculum were good.
26. The intern and/or work experiences enhanced my education.
27. The quality of laboratory facilities provided by the BAEM program was good.
28. The quality of computational facilities provided by the BAEM program was
good.
29. The senior design courses improved my ability to work as part of a team.
30. The hands-on laboratory experience provided me with a good understanding.

After graduation, my professional plans are:

Any comments either positive or negative you may have regarding your education experience are
extremely useful to us. In particular, please comment on any aspect of your program which you
erated a neutral or less. Specifically, indicate what could be improved and how this might be done.
Please provide your comments below.
